Do you have some hardware questions/issues that are giving you problems? Questions about your Windows server? Having issues with your anti-virus? Spam flooding your inbox? Tuor Networks is a Toronto company that specializes in Microsoft client & server products. They can guide you through the options and lead you to the correct one. They strive to find the solution that best fits your business, rather than having your business fit a particular solution (<http://www.tuor.ca>).
- 2:20-2:30 **BREAK**
- 2:30-3:15 **Security Roundtable**
Mark Murphy, LMS ProLink and Moe Elkateb, The Magnes Group
Following the presentation from Mike Holder from Tuor Networks, we will hold an open discussion on how brokers are addressing issues such as remote access, anti virus, spam, and overall security. This will make you more aware of potential threats to your brokerage. We want this to be as open and interactive as possible, so please bring your questions.
